We generally do not collect Personally Identifiable Information from you. We may collect some limited information from you through the following channels:

 - No user accounts or registration.
 - We never ask for your name or email.
 - Your workout history is only kept locally on the device by default.

- App is completely functional without an internet connection

This information is limited to the date of your workout, and the timer/settings/routine you engaged in during your workout. This information does not include your name or any Personally Identifiable Information. Your workouts are assigned to a randomly generated user ID.
- We use Firebase to collect statistics on how users use the Timer Suite Apps, contact technical support, and similar. This is aggregate user data and is not affiliated with any particular user.
- We use Firebase to collect statistics on where users are located, by country. This is aggregate user data and is not affiliated with any particular user.
- We use a helpdesk platform that users can register on in order to submit any help tickets. We may access to users' e-mail address and any other information they elect to provide as part of help tickets. This information is only utilized for customer support, is stored only for record-keeping and analytics purposes, and is not shared, subject to the exclusions below.

As indicated above, we may from time to time collect automatically-collected information when you access our services ("Usage Data"), such as browser information, link interaction with our products, Internet Protocol ("IP") address, and any other usage information collected through Firebase or any interaction with our servers. This information is not linked to your identity.
